

Allucent[®]

Shining a light on your next breakthrough

Allucent is a global CRO providing comprehensive drug development and clinical trial solutions for small and mid-sized biotech companies.

We are Allucent.
Our focus is you.

Small and mid-sized biotech organizations drive therapeutic innovation with their ambition and dedication to breakthrough science for complex therapeutic areas. Allucent's comprehensive drug development and clinical trial solutions are designed to support the unique requirements of smaller companies. We'll partner with you in a collaborative approach, matching your ambitions with our expertise. Our global clinical trial operations and regulatory experience can help you reach approval in any location.

THERAPEUTIC AREAS

Light the way through the complexities of clinical development with our services.

Allucent's regulatory, product development, and clinical research solutions are purpose-built and customized for the needs of small and mid-sized biotech. Increase your team's capabilities and resources with our expert collaboration and support.

Clinical Trial Operations

Our experience in patient-centric trial design and execution, complex therapeutic areas, and challenging indications is purpose built to augment your internal capabilities and support your clinical trial needs.

- Protocol Development
- Study Design
- Study Start Up and Feasibility
- Patient Recruitment and Retention Strategies
- Project Management
- Clinical Operations
- Medical Services

Biometrics

Allucent offers rigorous biostatistics consulting to prioritize data quality and integrity, ensuring the efficacy and safety of your study at every stage of your drug development journey.

- Biostatistical Consulting
- Statistical Programming
- Data Management
- Clinical Programming

Regulatory and Drug Development Consulting

Our experts have decades of experience with global regulatory agencies to help position your therapy for success. We have guided over 50 products from IND, IMP, or equivalent status to final approval.

- Clinical Strategy
- Nonclinical Services
- Chemistry, Manufacturing, and Controls
- Regulatory Affairs
- GxP Strategy Consulting
- Publishing and Submissions
- Medical Writing
- Medical Devices and Technology

Clinical Pharmacology Modeling Simulation

By converting complex data into actionable safety and efficacy insights across the entire drug development spectrum, we improve the efficiency and probability of success in your drug development outcomes.

- Clinical Pharmacology Integrated Drug Development
- Model Informed Dose and Drug Development
- Pharmacometrics, Pharmacokinetics, Pharmacodynamics
- DMPK and Translational Discovery and Development

Government and Public Health Services

Navigate the requirements of government-funded research, identify applicable regulations, and remain in compliance with the help of our knowledge and experience gleaned from multiple collaborations with governmental, non-governmental and non-profit organizations.

- Pre-award Consultancy
- Pre-Clinical and Clinical Trial Support Services

Partner with our -Team of senior-level experts.

Dedicated to small and mid-sized biotech, the Allucent A-team offers the same level of attention, respect, and expertise to clients and projects of every size.

Our experts work with you to get your product on the market as soon as possible and with financial prudence. We talk to you, and understand what your needs are, where you are in the process, and where you want to go before working with you to develop a strategy to navigate the drug development journey effectively and efficiently.
